

Circle 2 – Adaptation Frontiers

Session XII – Transition societal transformations, ethics, values and equity

Kirsten Hollaender, Peter Driessen & Lisa Almesjö

Programme Monday 10th March 16:00 – 17:30, Room Marvila

- **Lisa van Well** – Ensuring societal relevance in geotechnical climate adaptation science
- **Ines Campos** – A multi-arena governance framework for the study of transitions in the making
- **Alistair Hunt** – Equity and economic analysis in the determination of climate change adaptation
- **Manuel Gottschick** – Investigative and transformative research for societal transformation to sustainability

Programme Tuesday 11th March 14:00 – 15:30, Room Marvila

- **Dries Hegger** – Towards explanations of deep shifts in environmental governance practices: a framework and examples from the domain of flood risk governance in the Netherlands
- **Julie Snorek** – Divergent adaptation to climate variability: a case study of pastoral and agro-pastoral societies in Niger
- **Katrina Wiberg** – Regimes of value, climate change and the handling of water
- **Maximilian Riede** – The potential of transdisciplinary research-education co-operations as a step towards societal transformation

Key questions

- What are the main contributions of these papers and associated research projects to the understanding of societal transformations and what are the main similarities and differences?
- What is the relevance of these research findings for policy and/or society at large?
- What are relevant research issues on societal transformations for the next decade?
